

Coffee Supermarket

A good conversation starts with a good coffee

Modern Slavery Act Transparency Statement

We take a stand against human trafficking and Slavery. We do not tolerate any behaviour or business contracts that goes against our ethical and sustainability principles stated in our code of conduct, Business Ethics Policy, and our Sustainability Policy

We understand that the supply chain for coffee green or roasted has many risks when it comes to e.g., child labour or deforestation

We also manage the risks by purchasing directly to farmers or cooperatives that have been previously audited by us as a way to approve suppliers, both when it comes to coffee as well as other products or services we source
